**REASONS FOR ALLOWANCE**

1. Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a rubbing apparatus for a liquid crystal display device comprising a combination of various elements as claimed, more specifically a rubbing roller arranged above the base plate and connected to the platform; a conditioning roller arranged aside to the rubbing roller, above the base plate and connected to the platform; and a conditioning cloth disposed on a surface of the conditioning roller, wherein a surface of the conditioning cloth has a plurality of second pile fibers, wherein the rubbing roller rotates in a first rotating direction opposite to a second rotating direction in which the conditioning roller rotates, and wherein a predetermined distance is arranged between the rubbing roller and the conditioning roller, so that the second pile fibers of the conditioning cloth on the conditioning roller are in contact with the first pile fibers of the rubbing cloth on the rubbing roller, thereby rejuvenating the rubbing cloth on the rubbing roller.

Kodera ('750) discloses a rubbing apparatus for a liquid crystal display device comprising rubbing rollers provided with rubbing clothes, wherein the rotating direction of the rollers is changed for each substrate. However, Kodera fails to disclose the particular characteristics of the rubbing apparatus that is claimed in the present invention, such as "a conditioning roller arranged aside to the rubbing roller, above the base plate and connected to the platform; and a conditioning cloth disposed on a surface of the conditioning roller, wherein a surface of the conditioning cloth has a plurality of second pile fibers, wherein the rubbing roller rotates in a first rotating direction opposite to a second rotating direction in which the

conditioning roller rotates, and wherein a predetermined distance is arranged between the rubbing roller and the conditioning roller, so that the second pile fibers of the conditioning cloth on the conditioning roller are in contact with the first pile fibers of the rubbing cloth on the rubbing roller, thereby rejuvenating the rubbing cloth on the rubbing roller”.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
